2018-2019 AHERA Notification

As a result of federal legislation (Asbestos Hazard Emergency Response Act - AHERA), each primary and secondary school in the nation is required to complete a stringent inspection for asbestos and to develop a plan of management for all asbestos-containing building materials. Valders Area School District (VASD) has a goal to be in full compliance with this law and is following the spirit, as well as the letter of the law. As a matter of policy, VASD shall continue to maintain a safe and healthful environment for our community's youth and employee's.

In keeping with this legislation, all buildings (including portables and support buildings) owned or leased by the school district were inspected by EPA accredited inspectors and samples were analyzed by an independent laboratory, and based on the inspection, the district prepared and the state approved a comprehensive management plan for handling the asbestos located within its buildings safely and responsibly.

Furthermore, VASD has completed its AHERA 3-Year Re-inspection requirement. VASD buildings, where asbestos-containing materials were found, are under repair, removal and/or operations and maintenance.

This past year, VASD conducted the following with respect to its asbestos-containing building materials.

No materials were abated in the past year.

Federal law requires a periodic walk-through (called surveillance) every six months of each area containing asbestos. Also, the law requires for all buildings to be re-inspected every three years after a management plan is in effect. This will be accomplished under contract by MacNeil Environmental, Inc.

Short-term workers (outside contractors - i.e. telephone repair workers, electricians and exterminators) must be provided information regarding the location of asbestos in which they may come into contact. All short-term workers shall contact the lead maintenance person before commencing work to be given this information.

VASD has a list of the location(s) and types(s) of asbestos-containing materials found in that school building and a description and time table for their proper management. A copy of the Asbestos Management Plan is available for review in the school office. Copies are available at 25 cents per page. Questions related to the plan should be directed to the district office, who will establish contact with our Account Manager under contract with MacNeil Environmental, Inc. To reach MacNeil Environmental, Inc. to discuss the management of our asbestos materials or with any questions, MEI is available please call 800-232-5209 with questions.

2018-2019 Indoor Air Quality Notice (IAQ)

Valders Area School District (VASD) is proud to be taking a leadership role in providing a safe, comfortable and productive environment for our students and staff so that we achieve our core mission- educating students. Our school will follow the EPA guidance to improve our indoor air quality by preventing as many IAQ problems that may arise. Good air quality requires an ongoing commitment by everyone in our school, because each of us daily makes decisions, performs activities that can have an effect on the quality of the air we breathe.

The VASD works with MacNeil Environment to keep in compliance with the federal and state government rules. There is a copy of the written plan at the school district.

The VASD Indoor Air Quality (IAQ) contact person is John Linzmeier, Buildings and Grounds Supervisor.

If you have any questions or concerns about the district's IAQ program please contact the school at (920) 775-9500.
